DETAILED ACTION

Election/Restrictions

This application contains claims 6-10 drawn to an invention nonelected in the reply filed on 07/16/2007. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ballestrazzi (EP 526,944A1).

Ballestrazzi discloses the claimed method for packing an articles with a film comprising the claimed steps of drawing the film from a bobbin to form a band, Fig. 2; via 18; feeding the band along a vertical path defined between deflecting rollers and towards a conveying means; Fig. 2; via web 17 fed vertically; applying a longitudinal seal to one of the film's edge during the feeding of the band along the vertical path, Figs. 2 and 4; via adhesive dispensing gun 42 the once by the edges and a transverse seals, Figs. 2 and 4; via guns 42 the once on the middle and transverse adhesive 41, folding and joining the longitudinal edges and crosswise cutting to form separate packages, Fig. 4 and abstract, column 2, lines 3 and 4.

Ballestrazzi does not disclose the step of providing the film as of plastic film. However, the examiner takes an official notice that such use of plastic film to pack an article is old, well

known, and available in the art. Note that Ballestrazzi disclosed in the abstract "An apparatus for sealing a continuous web of packaging paper *or the like material*", meaning that Ballestrazzi's method is capable of being used with other material such as plastic.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Ballestrazzi's method by the use of plastic web instead of the paper, as a matter of engineering design choice, in order to come up with stronger package.

Regarding claim 2: longitudinal strip of glue and the transversal strip of glues applied to the same side of film, see for example Fig. 4; via glue guns 34 and 42 applies glue to the same side of the film.

Regarding claims 3 and 4: the longitudinal strip of glue via adhesive out of 34 is applied continuously and transverse strip of glue via 41 are applied to a side of the film 17.

Regarding claim 5: the longitudinal and transversely glue strips applied at an area upstream of backing the article, via guns 42 and 34 located upstream before finalizing the packing of the articles.

Response to Arguments

Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
